MANIFOLDS & COMPONENTS

# 1 Port Dualmix Stainless Steel Manifold Extension

## Adds one loop to a Dualmix manifold.

A single-port extension for the Dualmix stainless steel manifold. Use it to add one more heating loop to an existing manifold, or to make up an odd port count without buying a bigger manifold.

CODE
**MHMSS-1F-3/4x1**

01 · KEY FEATURES

### Why installers use it

- **Add a loop later.** Handy when a room is added or a loop has to be split.
- **Same stainless steel as the Dualmix.** It matches the manifold you already have.
- **One port, one loop.** Each port takes the flow or return of one heating circuit.

04 · ORDER CODE

# MHMSS-1F-3/4x1.

One code for this product. Check the specification on page 1 before you order.

05 · WORKS WITH

## Complete the system

**Dualmix Stainless Steel Manifold Assembly**

**Eurocone Connector Cores 3/4" to connect the pipe**

**2-Wire Thermal Actuator for zone control**

06 · FITTING AT A GLANCE

## Full steps in the install manual

1. Isolate the manifold with its ball valves and drain the manifold bars.
2. Remove the end unit (air vent or gauge) from the end of the bar you are extending.
3. Fit the extension to the bar end, keeping the outlets in line with the existing ports.
4. Refit the end unit to the end of the extension.

07 · QUESTIONS

## Asked by installers

**Which manifold does it fit?**

It is made to extend the Dualmix stainless steel manifold.

**Does it come with a pipe connector?**

No. Add a 3/4" Eurocone connector core to suit your pipe size.

08 · GOOD TO KNOW

## How many do I need?

One extension adds one port. If you need several more loops, a larger Dualmix manifold may be simpler. If you're unsure, send us your plans and we'll check the loop count.
