PUMPS & CONTROLS

10K Floor Probe for UFH Thermostats
10K NTC floor sensor, 3m cable.

A 10K NTC floor temperature probe with a 3m cable, for UFH thermostats. Use it as a replacement or add-on, laid in a conduit between the heating cables or loops, so the thermostat can read and limit the floor temperature.

CODE
MH-PROBE-10K

01 · KEY FEATURES

Why installers use it

- **10K NTC sensor.** The type most floor-sensing thermostats use.
- **3m cable.** Reaches from the floor to the thermostat back box.
- **Spare or replacement.** For MaxHeatUFH thermostats and other 10K-probe thermostats.

IN THE BOX

1 floor probe with 3m cable

02 · SPECIFICATION

Technical data

Sensor type	10K NTC
Cable length	3m

04 · ORDER CODE

MH-PROBE-10K.

One code for this product. Check the specification on page 1 before you order.

05 · WORKS WITH

Complete the system

- Heatmiser neoStat-e
- Heatmiser neoStat V3
- Pipe Conduit
- Heatmiser neoStat V3 (takes 10K, 12K and 15K probes)
- Electric underfloor heating mats

06 · FITTING AT A GLANCE

Full steps in the install manual

1. Check your thermostat takes a 10K NTC floor probe.
2. Lay a conduit from the thermostat back box into the floor, ending between two heating cables or pipe loops, not on top of them.
3. Push the probe into the conduit so the tip sits in the heated area. Seal the conduit end so screed or adhesive cannot get in.
4. Run the cable to the thermostat back box.

07 · QUESTIONS

Asked by installers

Will it work with my thermostat?

Yes, if your thermostat takes a 10K NTC floor probe. The Heatmiser neoStat V3 works with 10K, 12K and 15K NTC probes.

Where should it go?

In a conduit between the heating cables or pipe loops, not on top of them.

08 · GOOD TO KNOW

Fitting tip

Fit the probe inside a conduit so it can be pulled out and replaced later without lifting the floor.
