MANIFOLDS & COMPONENTS

3/4" Female Blanking Cap
Seals unused 3/4" outlets.

Screws onto a 3/4" male thread to seal it. On a manifold it closes an outlet you are not using yet, so you can fill and test before every loop is connected.

CODE
MHM-BC-3/4F

01 · KEY FEATURES

Why installers use it

- **Seal spare ports.** Fit a manifold with more ports than you need now and add loops later.
- **Test in stages.** Cap open outlets and pressure test the loops that are in.
- **Sold singly.** Buy one for each spare port.

IN THE BOX

1 blanking cap

02 · SPECIFICATION

Technical data

Thread	3/4" female
Fits	3/4" male threads such as Eurocone outlets

04 · ORDER CODE

MHM-BC-3/4F.

One code for this product. Check the specification on page 1 before you order.

05 · WORKS WITH

Complete the system

Dualmix Stainless Steel Manifold

1" Male Manifold Blanking Plug for the bar ends

Hydraulic Pressure Test Pump

06 · FITTING AT A GLANCE

3 steps, details in the install manual

1. Make sure the outlet thread is clean.
2. Screw the cap onto the outlet by hand, then nip it up with a spanner.
3. Fit one cap on the flow bar and one on the return bar for each unused loop.

07 · QUESTIONS

Asked by installers

What thread does it fit?

A 3/4" male thread, such as a 3/4" Eurocone manifold outlet.

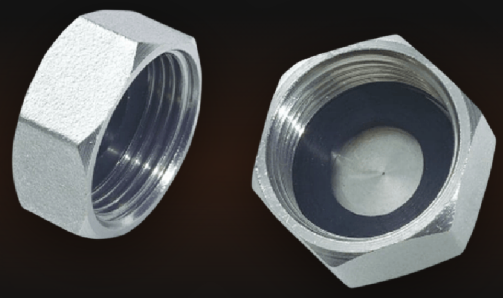

Can I remove it later?

Yes. Unscrew it and fit a connector core when you add the loop.

08 · GOOD TO KNOW

How many do I need?

One cap per unused outlet. Remember a spare loop has an outlet on both the flow and return bars, so that is two caps.

09 · AT A GLANCE

3/4" Female Blanking Cap

THREAD

3/4" female

FITS

3/4" male threads such as Eurocone outlets
