MANIFOLDS & COMPONENTS

3/4" Female Blanking Cap

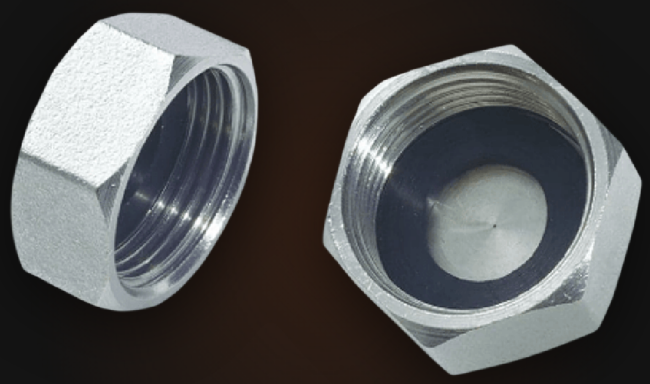

Seals unused 3/4" outlets.

Screws onto a 3/4" male thread to seal it. On a manifold it closes an outlet you are not using yet, so you can fill and test before every loop is connected.

CODE

MHM-BC-3/4F

PRODUCT

01 · IN THE BOX

What you get

- 1 blanking cap

02 · YOU WILL NEED

Tools and materials

- Spanner

03 · SAFETY

Before you start

- Installation should be carried out by a competent installer, in line with the system design and BS EN 1264.
- Isolate and drain down, or isolate with the manifold ball valves, before working on a filled system.
- Hot water and pressure can cause injury. Let the system cool and release pressure before opening any joint.

04 · INSTALLATION

Fit it in 3 steps.

1. Make sure the outlet thread is clean.
2. Screw the cap onto the outlet by hand, then nip it up with a spanner.
3. Fit one cap on the flow bar and one on the return bar for each unused loop.

05 · TESTING AND COMMISSIONING

Test, check, then hand over

- [x] Check the caps for weeps during the pressure test.

06 · CARE AND MAINTENANCE

Keep it working

- To add a loop later, isolate the manifold, remove the cap and fit a connector core.

07 · GOOD TO KNOW

How many do I need?

One cap per unused outlet. Remember a spare loop has an outlet on both the flow and return bars, so that is two caps.

08 · QUESTIONS

Asked by installers

What thread does it fit?

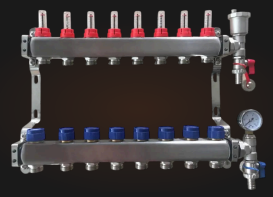

A 3/4" male thread, such as a 3/4" Eurocone manifold outlet.

Can I remove it later?

Yes. Unscrew it and fit a connector core when you add the loop.

09 · WORKS WITH

Parts that fit with it

Dualmix Stainless Steel Manifold

1" Male Manifold Blanking Plug for the bar ends

Hydraulic Pressure Test Pump
