HEATMISER CONTROLS

Heatmiser DS1 Thermostat
230V dial room thermostat.

A simple 230V dial room thermostat. Turn the dial to the temperature you want and the DS1 holds the room there. No timer, no menus: a low-cost choice for UFH zones and spare rooms.

CODE
HM-DS1

01 · KEY FEATURES

Why installers use it

- **A dial anyone can use,** with no programming
- Built-in air sensor reads the room where it is mounted
- Connects to a 230V wiring centre such as the Heatmiser UH4 or UH8
- **Low cost per zone**

IN THE BOX

- DS1 thermostat with backplate
- Fixing screws

02 · SPECIFICATION

Technical data

Supply	230V AC
Max switching current	3A
Temperature range	5 to 35°C
Mounting	Surface
Size (L x H x D)	92 × 92 × 26mm
Display	None (dial)
Floor sensing	No

04 · ORDER CODE

HM-DS1.

One code for this product. Check the specification on page 1 before you order.

05 · WORKS WITH

Complete the system

- Heatmiser UH4 or UH8 Wiring Centre
- 2-Wire Thermal Actuators 230V
- Heatmiser DS1-L (flush version with a display)

06 · FITTING AT A GLANCE

Full steps in the install manual

1. Choose a position that reads true room air: away from draughts, direct sun, radiators and the UFH manifold.
2. Isolate the supply to the heating controls and prove it dead.
3. Use the backplate as a template to mark the two fixing holes, drill, plug and screw the backplate to the wall.
4. Wire to the zone thermostat terminals of the wiring centre, following the Heatmiser wiring diagram supplied with the DS1.

07 · BEFORE YOU START

Safety

- Isolate the mains supply and prove it dead before removing a front plate or wiring any connection.
- A qualified electrician must make the final mains connections, to BS 7671.
- For indoor, dry locations only. Keep within the stated voltage and switching ratings.
