HEATMISER CONTROLS

Heatmiser Edge Multimode Thermostat 230V

One thermostat, four programming modes.

A 230V programmable thermostat you set up four ways on site: non-programmable, 5/2 day, 7 day or 24 hour. One stock item covers almost any UFH or radiator zone, with a white backlight that switches off when idle.

HM-EDGE

PRODUCT

01 · IN THE BOX

What you get

- Edge thermostat
- Fixing screws

02 · YOU WILL NEED

Tools and materials

- Small screwdrivers
- Wall back box
- Voltage tester

03 · SAFETY

Before you start

- Isolate the mains supply and prove it dead before removing a front plate or wiring any connection.
- A qualified electrician must make the final mains connections, to BS 7671.
- For indoor, dry locations only. Keep within the stated voltage and switching ratings.

04 · INSTALLATION

Fit it in 8 steps.

1. Choose a position away from draughts, direct sun and heat sources.
2. Isolate the supply to the heating controls and prove it dead.
3. Fit a back box and bring in the thermostat cable, plus the floor probe cable if used.
4. Wire to the zone terminals of the wiring centre per the Heatmiser diagram supplied.
5. Fit the thermostat to the back box and restore power.
6. Set the programming mode (non-programmable, 5/2, 7 day or 24 hour) in the setup menu.
7. Pair any wireless air sensors or window/door switches.
8. Set the clock and comfort levels, and the PIN lock if wanted.

05 · TESTING AND COMMISSIONING

Test, check, then hand over

- [x] Raise the set temperature above room temperature and check the zone responds at the wiring centre.
- [x] If a floor probe is fitted, check the floor reading appears.

06 · CARE AND MAINTENANCE

Keep it working

- Wipe with a dry cloth only.
- Replace wireless sensor batteries when the thermostat flags them.

07 · WORKS WITH

Parts that fit with it

- Heatmiser UH4 or UH8 Wiring Centre
- Heatmiser Wireless Air Sensor
- Heatmiser Temperature Sensor Probe for floor sensing

08 · AT A GLANCE

Heatmiser Edge Multimode Thermostat 230V
