HEATMISER CONTROLS

Heatmiser neoStat-HW Smart Hot Water Programmer

Hot water timing on the neo system.

A 230V smart programmer for the hot water cylinder. Timer mode gives 4 hot water times a day, with boost and changes from the neoApp once paired with a neoHub. It matches the neoStat range, so the whole house has the same look.

CODES

HM-NEOSTAT-HW-W, -B, -S

PRODUCT

01 · IN THE BOX

What you get

- neoStat-HW programmer
- Fixing screws

02 · YOU WILL NEED

Tools and materials

- Small screwdrivers
- 35mm deep wall back box
- Voltage tester

03 · SAFETY

Before you start

- Isolate the mains supply and prove it dead before removing a front plate or wiring any connection.
- A qualified electrician must make the final mains connections, to BS 7671.
- For indoor, dry locations only. Keep within the stated voltage and switching ratings.

04 · INSTALLATION

Fit it in 6 steps.

1. Isolate the supply to the heating controls and prove it dead.
2. Sink a back box at least 35mm deep and bring in a fused supply and the switch wiring.
3. Wire per the Heatmiser diagram supplied, using the changeover contacts as the valve or cylinder control needs.
4. Fit the programmer to the back box and restore power.
5. Select the mode (timer for hot water) and set the 4 hot water times.
6. To add app control, pair it to the neoHub from the neoApp.

05 · TESTING AND COMMISSIONING

Test, check, then hand over

- [x] Trigger a boost and check the hot water valve or cylinder control responds.
- [x] Check the timed periods switch on and off as set.

06 · CARE AND MAINTENANCE

Keep it working

- Wipe with a dry cloth only.

07 · WORKS WITH

Parts that fit with it

Heatmiser neoHub G3 | 2-Port Motorised Zone Valve | Heatmiser neoStat V3 for the heating zones

08 · MANUFACTURER DOCUMENTS

Official Heatmiser documents

Heatmiser neoStat-HW datasheet (official)
