HEATMISER CONTROLS

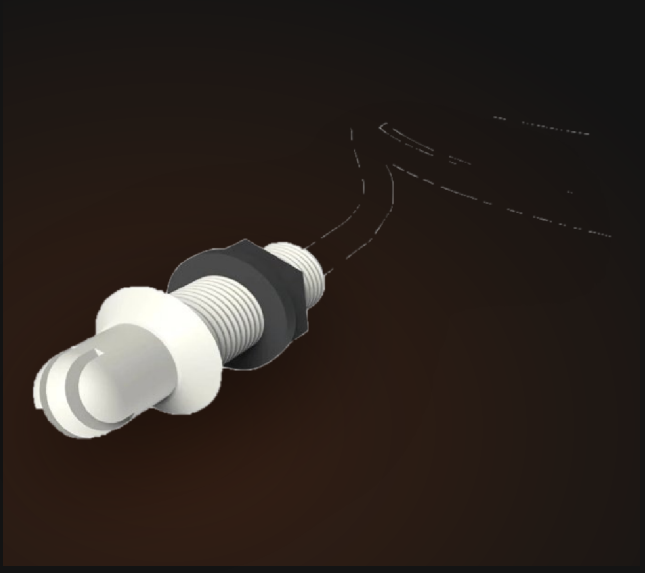

Heatmiser Thimble Sensor

Discreet wired room sensor.

A small wired room temperature sensor for rooms where the client does not want a thermostat on the wall: a feature wall, a bathroom or a show home. The thermostat sits somewhere less visible, and the thimble does the sensing.

CODE

HM-THIMBLE-SENSOR

01 · KEY FEATURES

Why installers use it

- Small form factor that blends into the room
- Wired up to 20m from the thermostat
- **Measures the room itself,** not the cupboard the thermostat sits in
- **No power supply of its own**

IN THE BOX

1 thimble sensor

02 · SPECIFICATION

Technical data

Type	Wired remote air sensor
Max cable run	20m
Works with	Heatmiser thermostats with a remote sensor input, such as the DS1-L and neoStat V3
Supplied as	1 sensor

04 · ORDER CODE

HM-THIMBLE-SENSOR.

One code for this product. Check the specification on page 1 before you order.

05 · WORKS WITH

Complete the system

- Heatmiser DS1-L
- Heatmiser neoStat V3

06 · FITTING AT A GLANCE

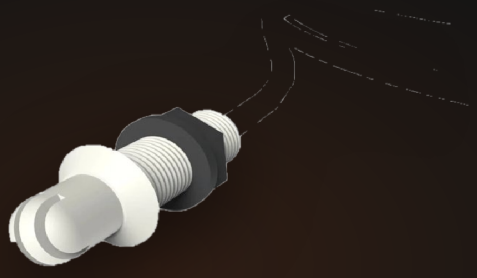

Full steps in the install manual

1. Isolate the thermostat circuit before wiring.
2. Choose the sensing position: true room air, away from draughts, sun and heat sources.
3. Run the sensor cable back to the thermostat, up to 20m, kept clear of mains cables.
4. Wire to the thermostat sensor terminals per the thermostat manual and select remote air sensing.

07 · BEFORE YOU START

Safety

- Isolate the thermostat and its circuit before wiring the sensor.
- A qualified electrician must make the final connections where the circuit is mains powered, to BS 7671.
- Route sensor cable away from mains cables to keep readings steady.
