MANIFOLDS & COMPONENTS

Manifold Auto Air Vent End Unit

Automatic air release for the manifold bar.

Fits on the end of a manifold bar and lets trapped air out of the system on its own. A spare or replacement, or for building a manifold from parts.

CODE
MHM-AV

01 · KEY FEATURES

Why installers use it

- **Lets air out on its own.** No need to bleed by hand each time.
- **Quieter, warmer loops.** Air in the system causes noise and cold spots.
- **Quick swap.** Replace a faulty vent without changing the whole manifold.

IN THE BOX

1 air vent end unit

02 · SPECIFICATION

Technical data

Fits	End of a UFH manifold bar
Supplied as	1 end unit

04 · ORDER CODE

MHM-AV.

One code for this product. Check the specification on page 1 before you order.

05 · WORKS WITH

Complete the system

Manifold Pressure Gauge End Unit

Manifold Ball Valve Set 1"

1" Male Manifold Blanking Plug

06 · FITTING AT A GLANCE

4 steps, details in the install manual

1. Isolate the manifold with its ball valves and release the pressure.
2. Remove the old vent or blanking plug from the top of the bar.
3. Fit the new vent end unit, vent cap facing up.
4. Open the vent cap so it can release air, then open the ball valves and refill.

07 · QUESTIONS

Asked by installers

Does the Dualmix manifold already have one?

Yes. The Dualmix assembly comes with an air vent fitted. This is a spare or replacement.

Is it a single unit?

Yes. It is sold as one end unit.

08 · GOOD TO KNOW

When to use it

Fit an air vent at the high point of each manifold bar. If an existing vent drips or sticks, isolate the manifold with its ball valves before you change it.
