MANIFOLDS & COMPONENTS

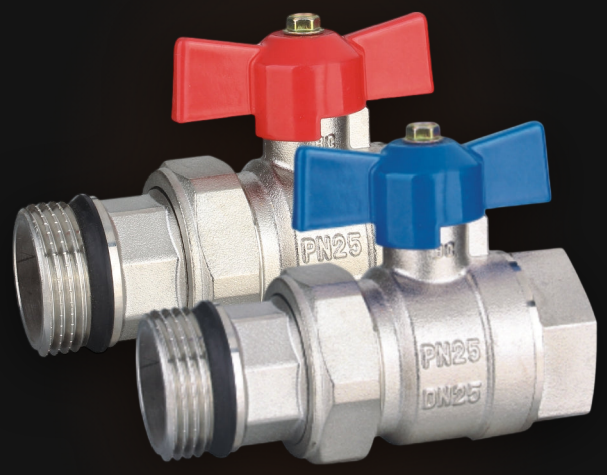

Manifold Ball Valve Set 1"
Red and blue isolating valves, pair.

A pair of 1" full-bore ball valves for isolating a UFH manifold from the pump and blending unit or the primary pipework. Red marks the flow and blue marks the return.

CODES

MHM-BV-1x2, -TG, -ATG, -FF

PRODUCT

01 · IN THE BOX

What you get

- 2 ball valves (red and blue)

02 · YOU WILL NEED

Tools and materials

- Spanners or grips for 1" fittings
- Thread sealant where a joint is not O-ring sealed

03 · SAFETY

Before you start

- Installation should be carried out by a competent installer, in line with the system design and BS EN 1264.
- Isolate and drain down, or isolate with the manifold ball valves, before working on a filled system.
- Hot water and pressure can cause injury. Let the system cool and release pressure before opening any joint.

04 · INSTALLATION

Fit it in 5 steps.

1. Fit the red valve to the flow bar and the blue valve to the return bar.
2. Point the handles where they can be turned easily, with clearance from the wall.
3. With gauge versions, fit so the dials can be read from the front.
4. Use the angled set where the primary pipes come up from below.
5. Connect the primary flow and return, or the pump and blending pack, to the valves.

05 · TESTING AND COMMISSIONING

Test, check, then hand over

- [x] Pressure test with the valves open, then close each one to check it holds.

06 · CARE AND MAINTENANCE

Keep it working

- Turn the valves fully open and closed once a year so they do not seize.

07 · QUESTIONS

Asked by installers

Is it a pair?

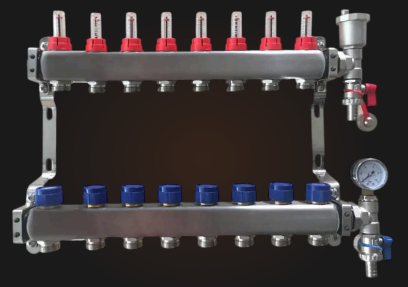

Yes. You get two valves, one red and one blue.

Which type should I choose?

The standard set suits most jobs. Choose the gauge versions to read flow and return temperatures, or the angled one when the pipes come up from below.

08 · WORKS WITH

Parts that fit with it

Dualmix Stainless Steel Manifold

Auto-Balancing Stainless Steel UFH Manifold

3/4" Ball Valve Set for Blending Valve
