MANIFOLDS & COMPONENTS

Manifold Flow Meter
See and balance each loop.

Sits on the flow bar and shows how much water is going round each loop, so you can balance the system and see when a loop is not flowing.

CODE

MHM-FM

PRODUCT

01 · IN THE BOX

What you get

- 1 flow meter

02 · YOU WILL NEED

Tools and materials

- Spanner

03 · SAFETY

Before you start

- Installation should be carried out by a competent installer, in line with the system design and BS EN 1264.
- Isolate and drain down, or isolate with the manifold ball valves, before working on a filled system.
- Hot water and pressure can cause injury. Let the system cool and release pressure before opening any joint.

04 · INSTALLATION

Fit it in 5 steps.

1. Check it matches the meters already on the manifold (send us a photo if unsure).
2. Isolate the manifold and release the pressure.
3. Unscrew the old meter and fit the new one.
4. Refill, vent and check the reading.
5. Set the loop to its design flow rate.

05 · TESTING AND COMMISSIONING

Test, check, then hand over

- [x] Check the meter reads with the loop open and drops to zero when closed.

06 · CARE AND MAINTENANCE

Keep it working

- A cloudy or stuck meter can be swapped the same way.

07 · GOOD TO KNOW

Before you order

Check that it matches the flow meters already on your manifold. If you're not sure, send us a photo and we'll confirm.

08 · QUESTIONS

Asked by installers

Is it sold singly?

Yes. You get one flow meter.

Will it fit my manifold?

It's made for UFH manifold flow bars. Send us a photo of yours if you want us to check.

09 · WORKS WITH

Parts that fit with it

Auto-Balancing Stainless Steel UFH Manifold

Manifold Auto Air Vent End Unit

Manifold Pressure Gauge End Unit
