MANIFOLDS & COMPONENTS

Manifold Pressure Gauge End Unit
Read system pressure at the manifold.

Fits on the end of a manifold bar and shows system pressure at a glance, so you can check the fill and spot a pressure drop early.

CODE
MHM-PG

01 · KEY FEATURES

Why installers use it

- **Read pressure at the manifold.** No need to go back to the boiler or heat pump.
- **Useful during testing.** Watch the gauge while you pressure test the loops.
- **Quick swap.** Replace a damaged gauge without changing the manifold.

IN THE BOX

1 pressure gauge end unit

02 · SPECIFICATION

Technical data

Fits	End of a UFH manifold bar
Gauge scale	0 to 10 bar, as fitted to the Dualmix manifold
Supplied as	1 end unit

04 · ORDER CODE

MHM-PG.

One code for this product. Check the specification on page 1 before you order.

05 · WORKS WITH

Complete the system

Manifold Auto Air Vent End Unit

Hydraulic Pressure Test Pump

Manifold Ball Valve Set 1"

06 · FITTING AT A GLANCE

4 steps, details in the install manual

1. Isolate the manifold with its ball valves and release the pressure.
2. Remove the old gauge from the bar end.
3. Fit the new unit with the dial facing out where it can be read.
4. Open the ball valves and refill.

07 · QUESTIONS

Asked by installers

Does the Dualmix manifold already have one?

Yes. The Dualmix assembly comes with a pressure gauge fitted. This is a spare or replacement.

Is it a single unit?

Yes. It is sold as one end unit.

08 · GOOD TO KNOW

When to use it

Fit it on the end of a bar where you can read it easily. Isolate the manifold with its ball valves before changing an existing gauge.
