MANIFOLDS & COMPONENTS

Manifold Pressure Gauge End Unit

Read system pressure at the manifold.

Fits on the end of a manifold bar and shows system pressure at a glance, so you can check the fill and spot a pressure drop early.

CODE

MHM-PG

PRODUCT

01 · IN THE BOX

What you get

- 1 pressure gauge end unit

02 · YOU WILL NEED

Tools and materials

- Spanner

03 · SAFETY

Before you start

- Installation should be carried out by a competent installer, in line with the system design and BS EN 1264.
- Isolate and drain down, or isolate with the manifold ball valves, before working on a filled system.
- Hot water and pressure can cause injury. Let the system cool and release pressure before opening any joint.

04 · INSTALLATION

Fit it in 4 steps.

1. Isolate the manifold with its ball valves and release the pressure.
2. Remove the old gauge from the bar end.
3. Fit the new unit with the dial facing out where it can be read.
4. Open the ball valves and refill.

05 · TESTING AND COMMISSIONING

Test, check, then hand over

- [x] Compare the reading with the boiler or test pump gauge.

06 · CARE AND MAINTENANCE

Keep it working

- Note the cold-fill pressure at handover so a drop is easy to spot.

07 · GOOD TO KNOW

When to use it

Fit it on the end of a bar where you can read it easily. Isolate the manifold with its ball valves before changing an existing gauge.

08 · QUESTIONS

Asked by installers

Does the Dualmix manifold already have one?

Yes. The Dualmix assembly comes with a pressure gauge fitted. This is a spare or replacement.

Is it a single unit?

Yes. It is sold as one end unit.

09 · WORKS WITH

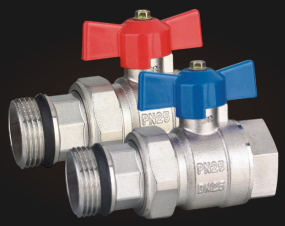

Parts that fit with it

Manifold Auto Air Vent End Unit

Hydraulic Pressure Test Pump

Manifold Ball Valve Set 1"
