FIXINGS

Pipe Support Bend

Supported 90° turn up to the manifold.

Holds underfloor heating pipe in a smooth, supported 90 degree turn where it comes up out of the floor to the manifold, so the bend stays neat and the pipe does not kink or flatten.

CODE

MH-PSB

PRODUCT

01 · IN THE BOX

What you get

- 1 pipe support bend

02 · YOU WILL NEED

Tools and materials

- Fixings to suit the floor or wall

03 · SAFETY

Before you start

- Installation should be carried out by a competent installer, in line with the system design and BS EN 1264.
- Wear gloves and eye protection when cutting pipe, handling metal plates or using hand tools.
- Release system pressure and let pipework cool before cutting into or disturbing any filled pipe.

04 · INSTALLATION

Fit it in 5 steps.

1. Mark where each pipe will leave the floor below its manifold port.
2. Clip the pipe into the support bend.
3. Fix the bend in place so the pipe rises straight up to the manifold.
4. Repeat for every flow and return pipe, keeping the bends evenly spaced.
5. Cut the pipe to length at the manifold and connect with a Eurocone core.

05 · TESTING AND COMMISSIONING

Test, check, then hand over

- [x] Check the pipe is not kinked or flattened in the bend before screeding.

06 · GOOD TO KNOW

How many do I need?

Usually one for each pipe end at the manifold: two per loop, one for the flow and one for the return.

07 · QUESTIONS

Asked by installers

Is it sold singly?

Yes. Order one for each pipe end that needs a supported bend.

Where does it go?

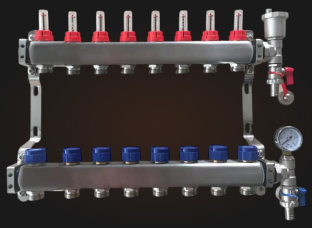

At the point where the pipe leaves the floor and turns up to the manifold.

08 · WORKS WITH

Parts that fit with it

Pipe Conduit for 16mm Pipe

Dualmix Stainless Steel Manifold Assembly

Eurocone Connector Cores 3/4"
