PUMPS & CONTROLS

Pressure / Temperature Gauge for UFH Mixing Unit

Replacement combined gauge.

A replacement combined pressure and temperature gauge for UFH pump and blending valve units. One dial shows system pressure in bar and flow temperature in °C, so you can check the mixing unit at a glance.

CODE

MH-GAUGE-PT

01 · KEY FEATURES

Why installers use it

- **Two readings, one dial.** Pressure in bar and temperature in °C.
- **Made for our units.** Suits our UFH blending valve and pump pack units.
- **Threaded brass connection.** Screws into the gauge point on the unit.
- **Quick to replace.** Swap a broken or misted gauge without changing the pack.

One code for this product. Check the specification on page 1 before you order.

04 · WORKS WITH

Complete the system

UFH Manifold Blending Valve 20 to 55°C (Valve Only)

Single Room UFH Mixing Pump Pack (Valve Only)

ESBE Single Room UFH Mixing Pump Pack (Valve Only)

05 · FITTING AT A GLANCE

Full steps in the install manual

1. For other makes of pack, check the thread on your existing gauge first.
2. Isolate the unit and release the pressure. Let it cool.
3. Unscrew the old gauge from the gauge point.
4. Seal the thread and screw the new gauge in, finishing with the dial facing the front.

06 · QUESTIONS

Asked by installers

What does it measure?

System pressure in bar and water temperature in °C.

Will it fit my pump pack?

It's made to suit our UFH blending valve and pump pack units. For other brands, check the thread on your existing gauge first.
