PUMPS & CONTROLS

Pressure / Temperature Gauge for UFH Mixing Unit

Replacement combined gauge.

A replacement combined pressure and temperature gauge for UFH pump and blending valve units. One dial shows system pressure in bar and flow temperature in °C, so you can check the mixing unit at a glance.

CODE

MH-GAUGE-PT

PRODUCT

01 · IN THE BOX

What you get

- 1 gauge

02 · YOU WILL NEED

Tools and materials

- Spanner
- Thread sealant suitable for heating systems

03 · SAFETY

Before you start

- Isolate the electrical supply before working on a pump, actuator or valve head. A qualified electrician makes the final connection, to BS 7671.
- Close the isolating valves or drain down, and release the pressure, before opening any joint.
- Pumps, valves and pipework can be hot. Let the system cool before you handle them.

04 · INSTALLATION

Fit it in 5 steps.

1. For other makes of pack, check the thread on your existing gauge first.
2. Isolate the unit and release the pressure. Let it cool.
3. Unscrew the old gauge from the gauge point.
4. Seal the thread and screw the new gauge in, finishing with the dial facing the front.
5. Refill and repressurise, then check the gauge for weeps.

05 · TESTING AND COMMISSIONING

Test, check, then hand over

- [x] Compare the pressure reading with the boiler or filling loop gauge.

06 · CARE AND MAINTENANCE

Keep it working

- Note the cold-fill pressure at handover so a drop is easy to spot.

07 · QUESTIONS

Asked by installers

What does it measure?

System pressure in bar and water temperature in °C.

Will it fit my pump pack?

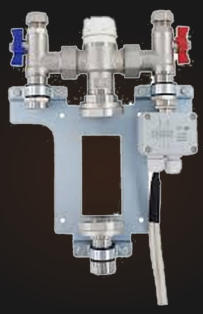

It's made to suit our UFH blending valve and pump pack units. For other brands, check the thread on your existing gauge first.

08 · WORKS WITH

Parts that fit with it

UFH Manifold Blending Valve 20 to 55°C (Valve Only)

Single Room UFH Mixing Pump Pack (Valve Only)

ESBE Single Room UFH Mixing Pump Pack (Valve Only)
